September 2016 Release

webinar
approach

demo

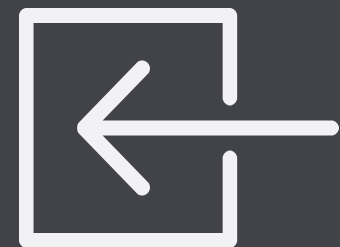

data in

Completely new data access solution with more connectors

more analysis

Add the power of statistical and predictive ecosystems to ACL

results out

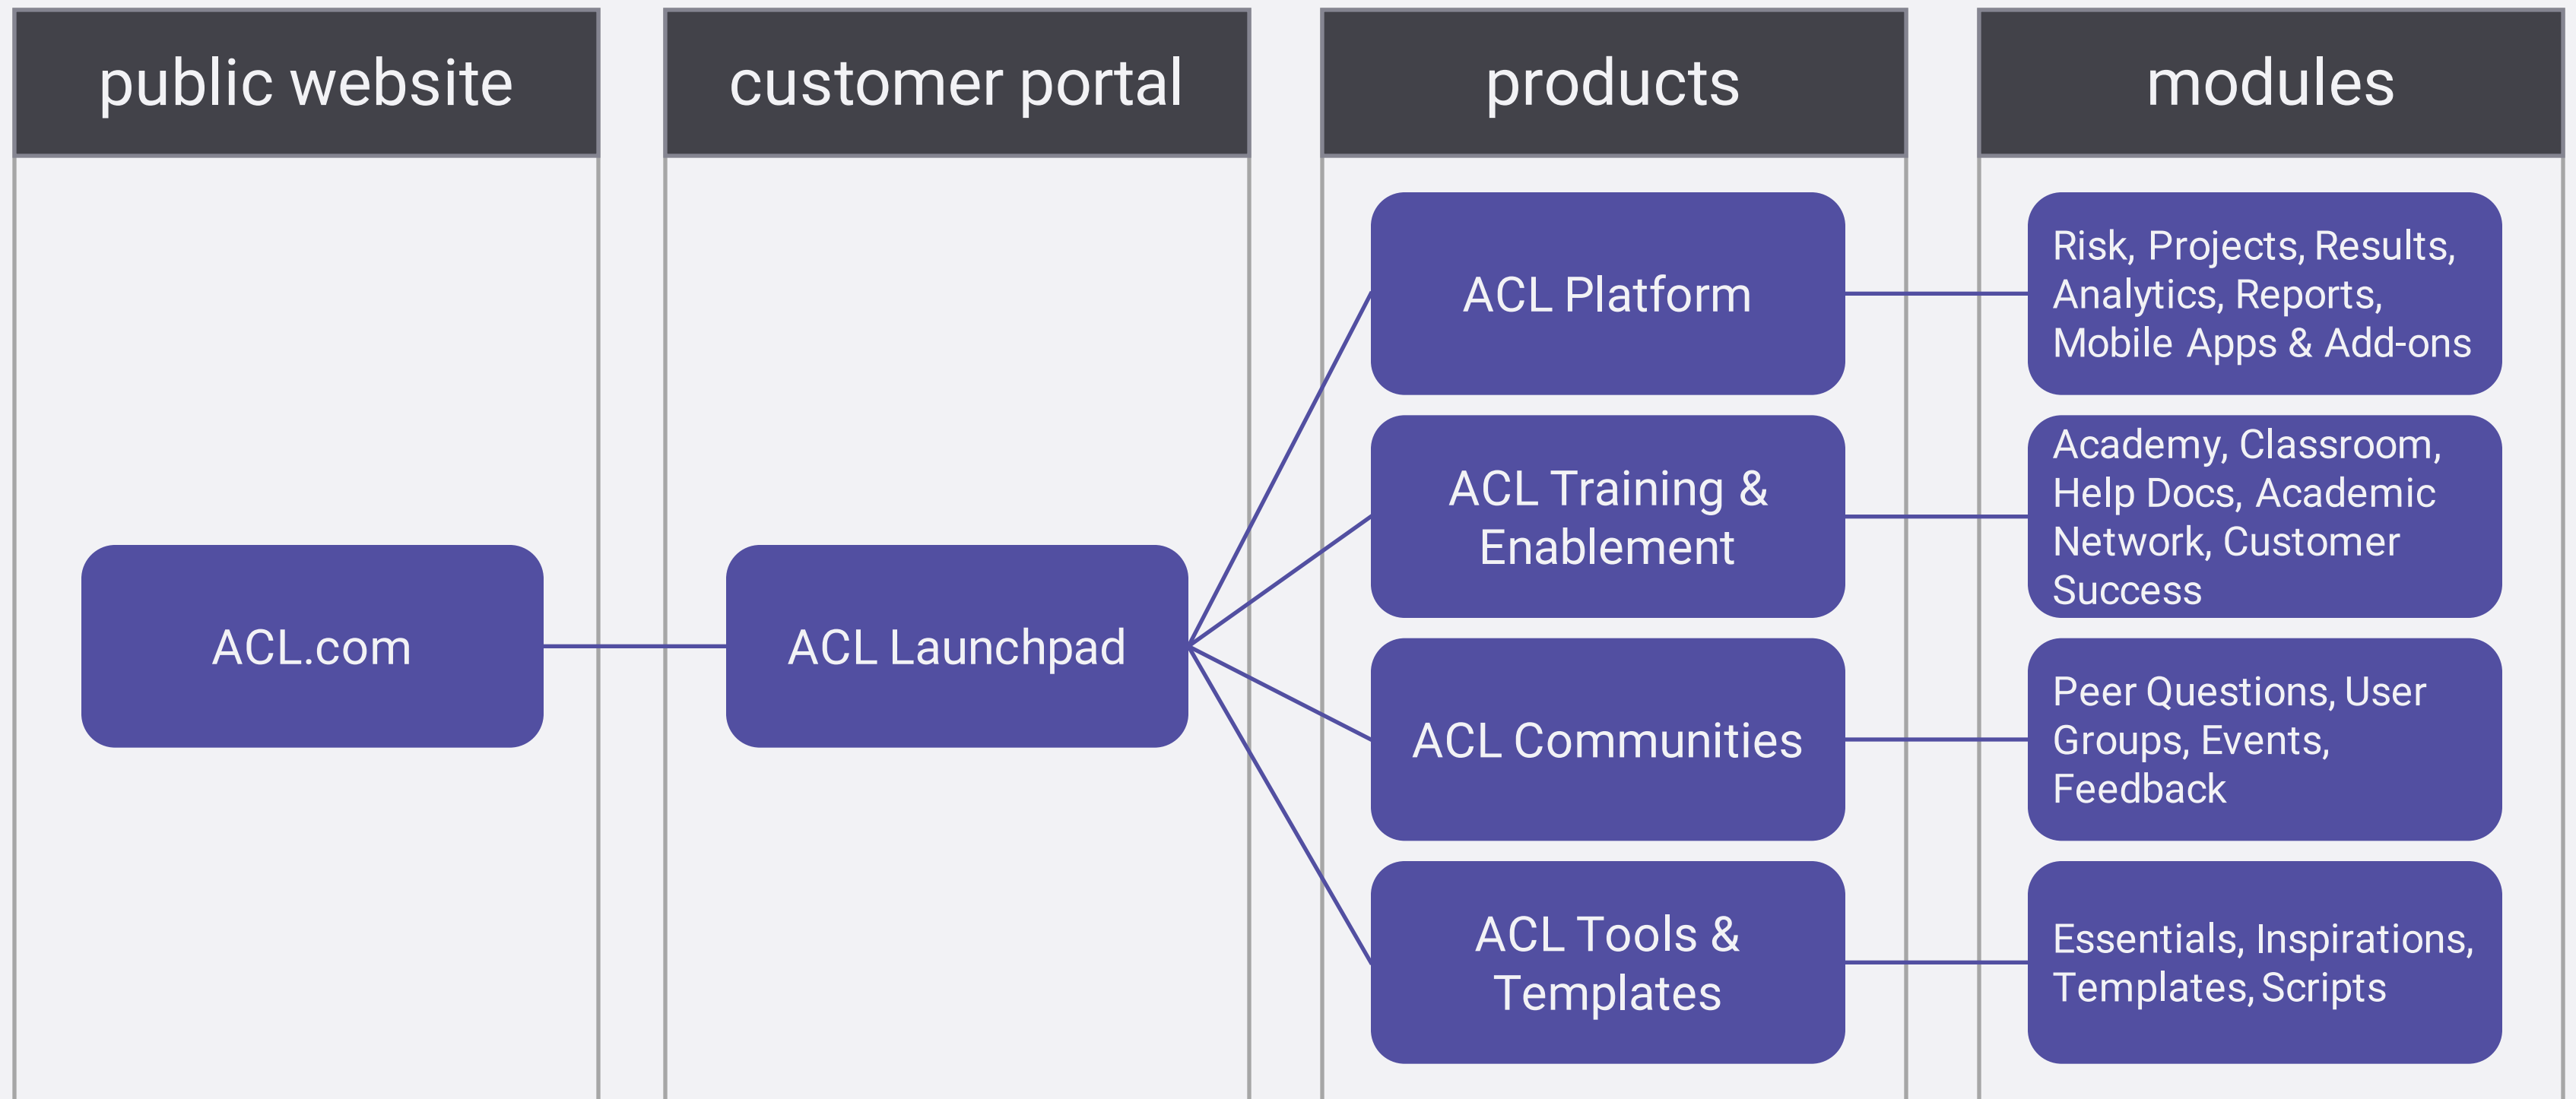

Unlimited options for data visualization and reporting

「open data」

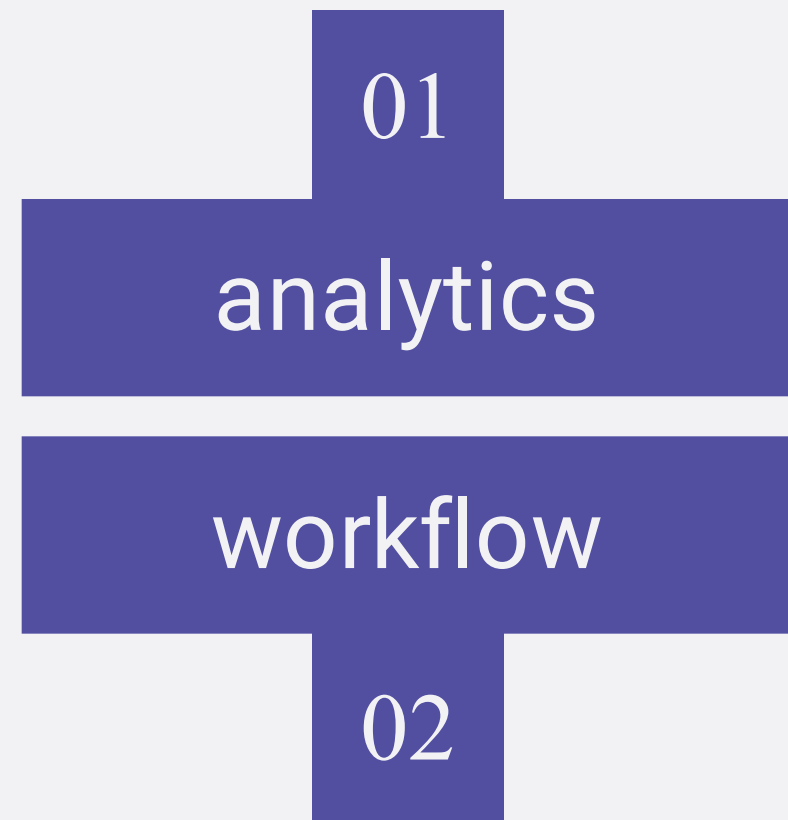

embracing the
era of open data
at ACL

「experience of one」

delivering an experience of one

product demos

defining data-driven grc

01

Bring large and diverse data sets into ACL and leverage the full power of the broader analytics ecosystem

analytics

Blend powerful new ACL analysis functionality with R and Python statistical and predictive analytics

analytics demo

Easier, more powerful access to data sets from traditional databases, "big data" storage systems, and the cloud

Enhanced native visualization and direct integration with any other visualization or reporting tool (Tableau certified)

defining data-driven grc

02

Turn insight into action with data storytelling and issue remediation through questionnaires and automation

workflow

Improved follow-up and remediation with enhanced surveys, questionnaires, and trigger workflow

workflow demo

Complete capabilities for data presentation including storyboards, KPIs/KRIs, and cloud sharing available to all customers

Detailed information on procedures and certifications for cloud security to make approval easy

defining data-driven grc

03

Leverage Inspirations ideas, Scripthub scripts, and Essentials analysis apps as well as enhanced training and help guides

content

ACL Essentials, the “out of the box” analysis apps for your core business process areas

content demo

Expanded library of Inspirations ideas for applying analytics and more integrated app development with Scripthub

ACL Academy v2.0, now, with CPE credits, as well as new and improved help guides

defining data-driven grc

04

Connect, share,
and learn from
professionals
across 8000 other
organizations.
You are not alone.

community

Build and grow your
local user group and
interact with members

community demo

The ACL user forum,
expanded to provide a much
better environment to
connect with peers and learn
from each other

Provide product feedback
ideas and interact directly
with product designers and
others at ACL
